

"move on"

©v.c.ilagan&r.lledo2008 from 'together' album

I thought that we agreed that it was over
I thought that you and I already had this talk

When you gonna leave me alone you call me everyday
How long we gonna play this game, you're driving me insane

let's not go through this again, who are you tryin' to kid don't pretend
we're livin' a lie if you think you're doin' right

Cause I gotta move on, you've lost the love from me
I don't want retribution, I just want to make you see
you can't go on like this
what have I missed, I guess you don't know just what you want
but I know I want to help you... to move on

Don't get me wrong I'm not sayin it was all bad
You taught me good I really learned from you
I'm sure you gonna be just fine you'll find your man one day
Remember what I said to you, there's nothin left to do

Do I have to remind you again, what you tryin to prove that was then
when you gonna wake up, it's over, we can't lie

Cause I gotta move on, you've lost the love from me
I don't want retribution, I just want to make you see
you can't go on like this

what have I missed, I guess you don't know just what you want
but I know I want to help you...

And I'm not about to bring back anything bad from the past
you can bet I'm beyond that I've left all that behind me now
and I've let time somehow cool me down
allow me to ask you then why, after we said goodbye
do you call me & ask to change my mind
Im sorry but I've gotta move on
